This is an example of a wireframe for a collaborative marketplace of services based on daily time management. Cocorico is particularly well suited to various professions, including services and mobility.

For the reminder: The Wireframe consists in creating a schema defining the areas of a website and its layout. Do not take into account texts that are fictitious. Also, the Wireframe does not bring notions of color, harmony, or detail of the elements. It is not the design itself; the Wireframe is used to define the layout of the elements in your website.

About your listing

Title: choose a short and clear title for your listing. It's the first thing your customers will see, it's time to shine!

Description: Add all relevant information about your service so that buyers can make instant purchases without having to request additional information.

Rules and conditions: optional. If you wish, you can define here the rules and conditions of your service.

---

Medias

You can add different media depending on the language (for example, add different videos depending on the language). If you don't want to add individual media per language you don't have to do anything: the platform will duplicate them for you.

Tips:
Add images, videos (youtube link only) or documents (pdf only) to your listing. This is a great way to showcase yourself.

Images Files Videos

Accepted formats: jpg, png, gif
Click here to select your files
Or just drag and drop them here

Drag and drop your media in the desired order. The first image will be used as your cover image.

What services do you offer?
You can either activate a service from the templates provided or create a new service manually. If you select a pre-existing template you will be able to modify all the information it contains, including price, description, conditions, etc.

Information:
You must select or add at least 1 service. You will have the possibility in your back office to modify the information of the services you select (title, description, duration, price, etc.). You can also create it yourself.
